

cloak<sub>wire</sub>

Distributed Risk's Cloakwire team is a unique partnership focused on emerging technology and critical infrastructure.

C L O A K W I R E S E C U R E S

# DIGITAL ASSETS

We provide comprehensive solutions to clients in the blockchain, cryptocurrency, and digital asset space. Backed by researchers and engineers with a wealth of experience in full-scope offensive engagements, cryptography, and smart contract audits, we ensure that your organization is ready to take on the unknown.

Your financial products are not the only thing that need to stand up to the persistent attacker. Your processes, procedures, and infrastructure will be engaged by our team as we uncover even the most subtle gaps in detection and response capabilities.

We don't stop at smart contract and protocol-level audits. Your people will be exposed to social engineering campaigns leveraging real-world techniques designed to provide training through hard lessons.

ATTACK EMULATION

## SIM SWAP / SIMJACK

Cloakwire partner Unit221b is at the forefront of threat discovery.

Through our joint efforts in Red Teaming and Threat Intelligence operations, we have developed extremely practical, highly engaging services that address the very specific attack vectors being used against crypto institutions and users alike.

Want to find out if a compromise of your employees' personal accounts can lead to incalculable losses? We can help you with that.

NETWORK ANALYSIS

## PROOF OF STAKE

Cloakwire and its advanced technical service partners perform simulated attacks on validator nodes and infiltrate operation team systems in this specific analysis service focused on proof-of-stake networks as well as the processes and systems used by staff to administrate and maintain them.

COMPREHENSIVE AUDIT

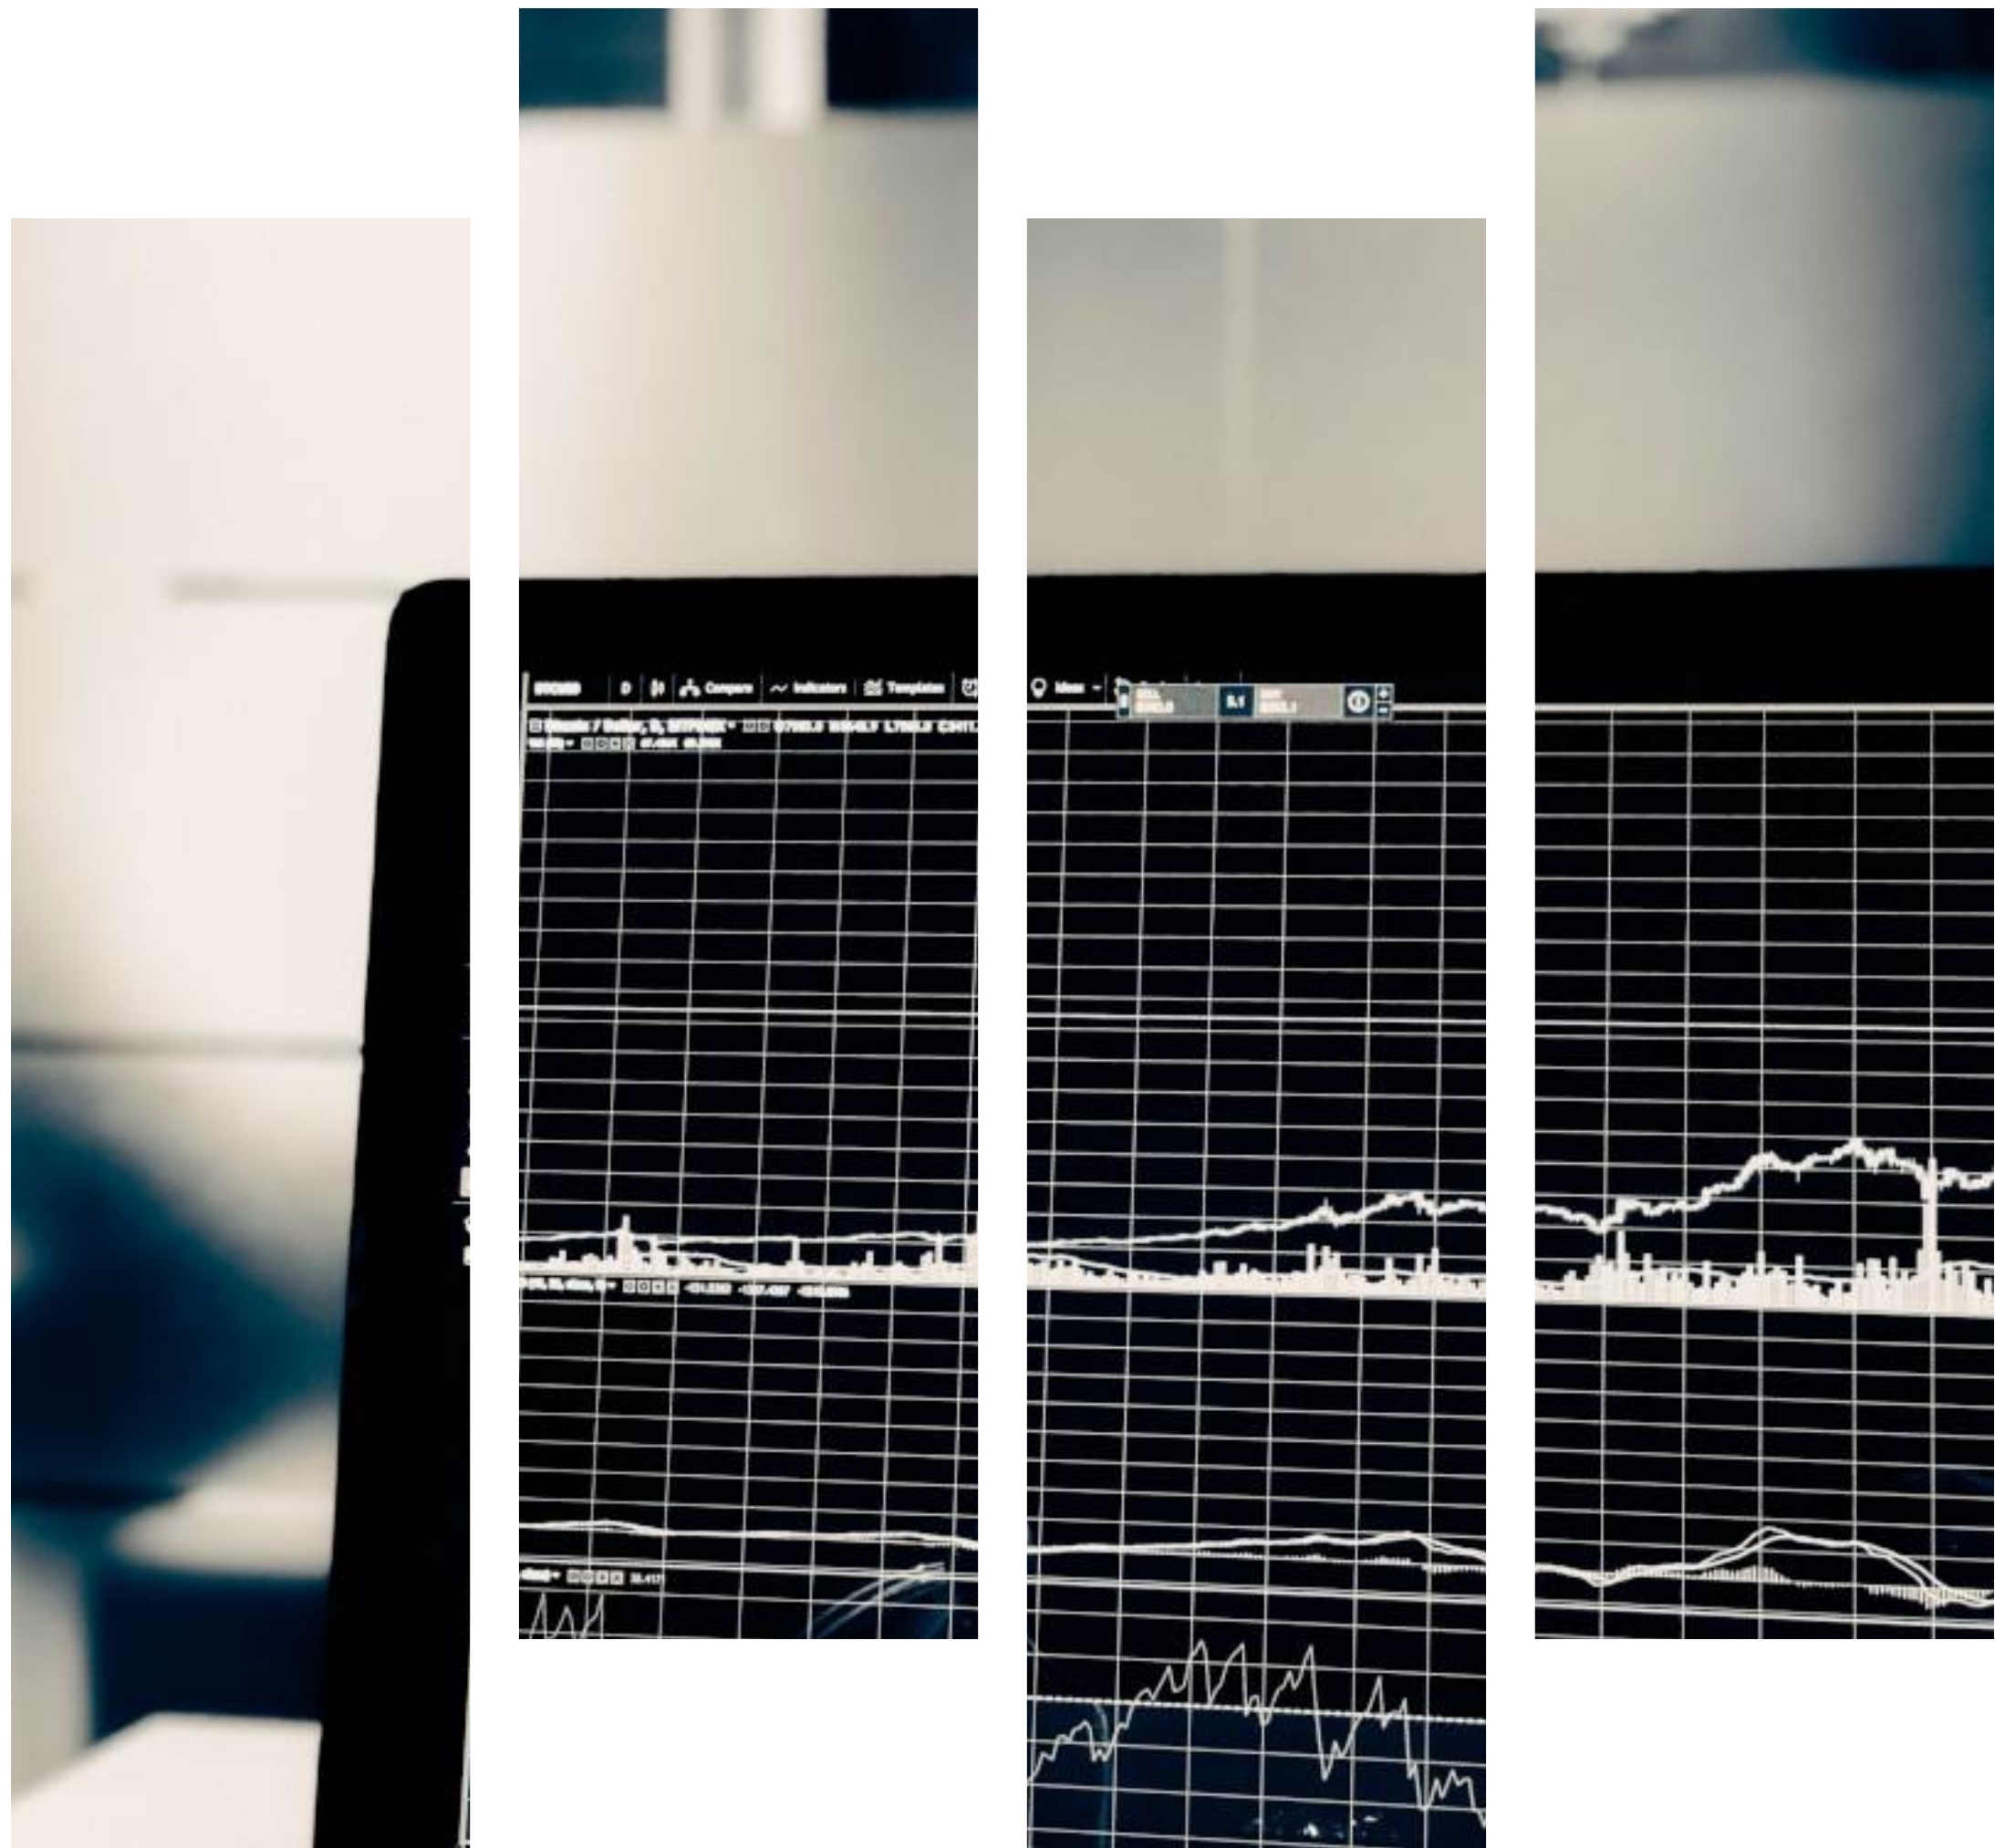

## SMART CONTRACTS

We have developed a fully comprehensive Smart Contract Auditing solution with the founders of I2P which considers the fundamentals as well as the use cases for smart contracts. Our internal and partner team members have experience specifically working against crypto companies, digital assets and products.

BLOCKCHAIN ANALYSIS &

## CRYPTO FORENSICS

By working with blockchain analysis tool developers and notable security engineers operating in the cryptocurrency space, we perform exhaustive analysis to identify threat actors, trace funds, uncover criminal activity, support incident response, and aid law enforcement efforts on a global scale.

FINANCIAL TECHNOLOGY

# SECURITY SOLUTION

When it comes to an honest assessment of your security posture, there is no time like the present.

With mass adoption of central bank digital currency and cryptocurrency around the globe coinciding with such a turbulent time in history, criminal attackers and hostile nations alike are positioning themselves on the offensive.

They are coordinating sophisticated attacks on a regular basis against institutions just like yours to fund their continued missions.

Don't be their wallet - and don't be the next headline.
